

Community information session.

Please join us for an open house to learn about TC Energy's proposed Pumped Storage Project. Come out and enjoy some refreshments and a conversation about the project. Everyone is welcome and we hope to see you there.

Thursday, January 16, 2020

Thursday, January 23, 2020

5:30 p.m. Doors open

6 – 6:30 p.m. Presentation

6:30 – 9 p.m. Drop-in style open house

**Meaford and St. Vincent Community Centre – Auditorium
(151 Collingwood Street, Meaford)**

At 6 p.m., TC Energy will provide an overview presentation of its proposed project. Following the presentation, TC Energy representatives will be available to provide information on the project, answer your questions and listen to your feedback.

About the proposed project

TC Energy is in the early stages of determining if a Pumped Storage Project can be developed on the Canadian Army's 4th Canadian Division Training Centre, in the Municipality of Meaford. The project would provide 1,000 MW of flexible, clean energy to Ontario's electricity system using a technology known as pumped storage. It would be designed to store electricity when it is available in excess of our needs – typically electricity that would otherwise be wasted or exported at a loss. That stored energy would then provide emission-free electricity back to Ontarians when they need it most. There are numerous levels of assessment and approvals required before this concept could become a reality.

If you are not able to attend the open house or if you have any questions or comments, please contact TC Energy at:
